Alberta leads with the highest share on luxury experience categories like recreation and entertainment, with significant spending on personal care and alcoholic beverages enhancing the profile of luxury spending.

Ontario follows closely, with strong spending across entertainment, recreation, and alcoholic beverages.

Quebec and British Columbia also showcase substantial spending in entertainment and recreation, indicating healthy luxury experience markets.

Manitoba has a smaller but notable share in luxury spending focused on entertainment and recreation.

Income-Based Spending Patterns:

Higher income groups spend considerably more on luxury and leisure items.

Lower income groups prioritize essentials like Food and Transportation.

Income segment differentiation is crucial for targeted marketing and product positioning.

Category Spending Across Provinces:

Different provinces show variation in category preferences, which can guide regional customization of products or services.

Spending Breakdown by Province and Category Examples (CAD):

Alberta: Transportation \$20,693; Food \$11,293; Recreation \$775

British Columbia: Transportation \$19,884; Food \$10,898; Recreation \$651

Ontario: Food \$10,760; Clothing \$3,550; Recreation \$774

Total Spending by Province

Spending by Province:

Ontario and Alberta stand out as the highest spending provinces, indicating strong consumer markets.

Provinces like British Columbia also show notable spending, especially in leisure and entertainment.

Average Household Spending by Province (CAD):

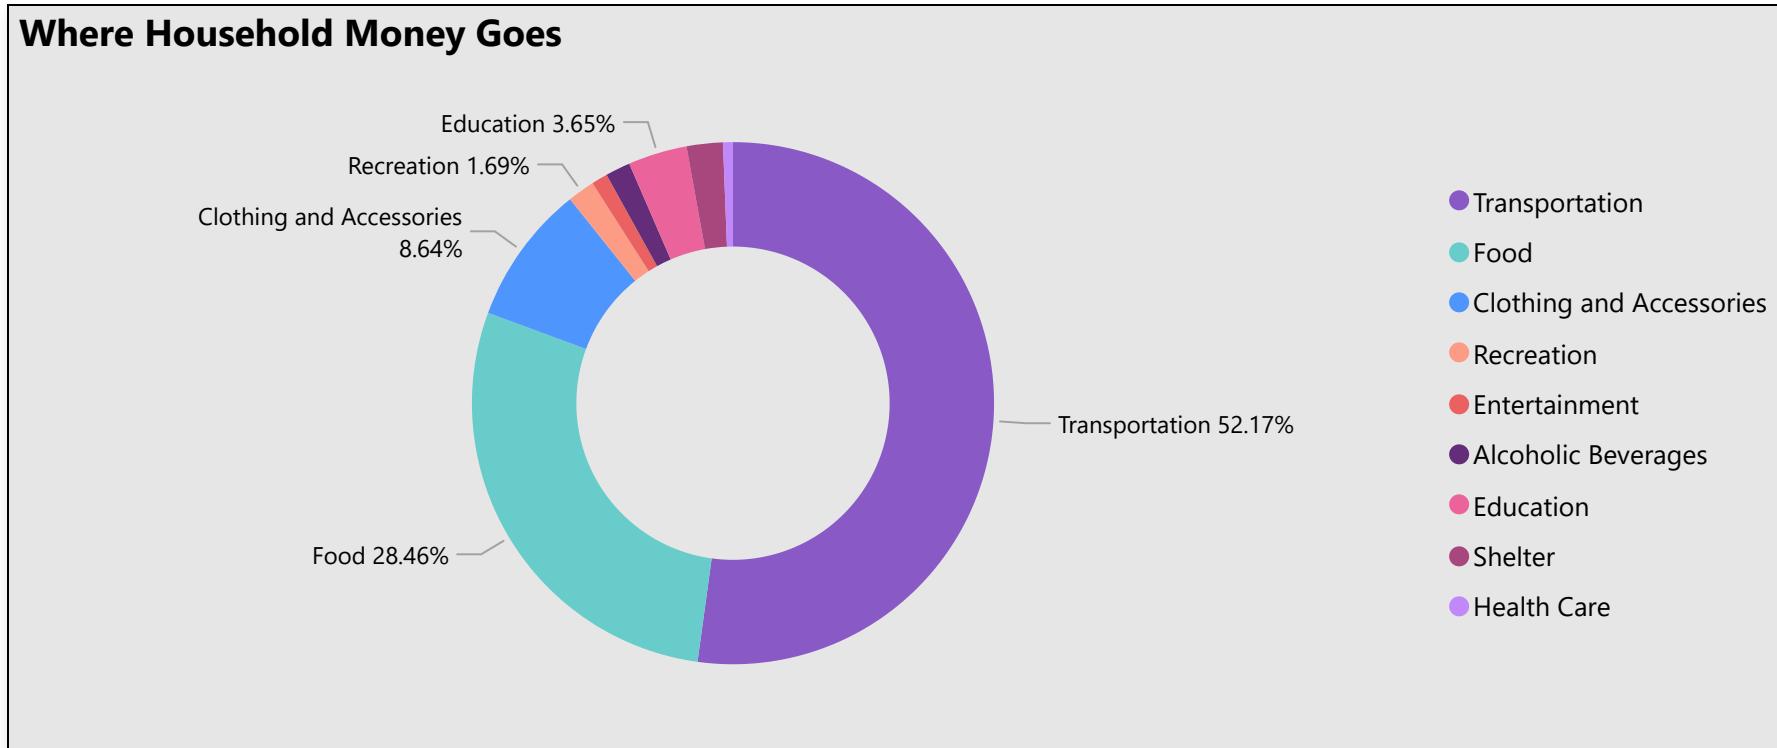

Ontario: \$37,265,293 total with average per household \$39,360

Alberta: Average household spending \$20,693 (sample figure)

British Columbia: Average household spending \$19,884

Other provinces show spending ranging from \$16,921 (Manitoba) to around \$10,591 (Quebec)

Where Household Money Goes

Spending by Categories:

Transportation and Food take large shares of household budgets across provinces with 52.17% and 28.46% respectively.

Shelter & Clothing and Accessories making 10.88% in total, also represent significant spending categories.

Entertainment and Recreation show growth potential, especially in higher-income provinces.

Recommendations:

- Focus business efforts on regions like Ontario, Alberta, and British Columbia, which exhibit the highest household spending, particularly in luxury and discretionary categories.
- Income-Based Market Segmentation: Use income group data to tailor product offerings and marketing:
 - Target luxury experiences (entertainment, recreation) to high-income households (over \$200K).
 - Focus essentials and value offerings for lower-income groups.
- Category Prioritization: Pay special attention to transportation and food since they represent significant spending shares, and to recreation and entertainment as growing luxury experience categories.
- Leverage Provincial Spending Preferences: Customize offerings by province according to regional spending patterns and preferences, ensuring relevance and resonance with local consumers.
